In social science research, typical units of analysis include individuals (most common), groups, social organizations and social artifacts. Sun, 02 Dec 2018 03:06:00 GMT Unit of analysis - Wikipedia - In science and research, an attribute is a characteristic of an object (person, thing, etc.). Attributes are closely related to variables. A variable is a logical set of attributes. Variables can "vary" - for example, be high or low. How high, or how low, is determined by the value of the attribute (and in fact, an attribute could be just the ...
