Wed, 09 Jan 2019 18:27:00 GMT j chakrabarty theory of plasticity pdf - Stress is the force per unit area on a body that tends to cause it to change shape. Stress is a measure of the internal forces in a body between its particles. These internal forces are a reaction to the external forces applied on the body that cause it to separate, compress or slide. External forces are either surface forces or body forces.
